THE ANNALS
of
PROBABILITY

An Official Journal of the
Institute of Mathematical Statistics

VOLUME 16

1988

CONTENTS OF VOLUME 16

Special Invited Papers and Articles

ALGOET, PAUL H. AND COVER, THOMAS M. A sandwich proof of the Shannon–McMillan–Breiman theorem 899–909

ALGOET, PAUL H. AND COVER, THOMAS M. Asymptotic optimality and asymptotic equipartition properties of log-optimum investment 876–898

ANDJEL, ENRIQUE D. A correlation inequality for the symmetric exclusion process 717–721

ANDJEL, ENRIQUE D. A zero or one law for one dimensional random walks in random environments 722–729

ANDJEL, ENRIQUE D. The contact process in high dimensions ... 1174–1183

ARIMOTO, AKIO. Approximation of the finite prediction for a weakly stationary process 355–360

ATHREYA, K. B. On the maximum sequence in a critical branching process 502–507

AVRAM, FLORIN. Weak convergence of the variations, iterated integrals and Doléans-Dade exponentials of sequences of semimartingales 246–250

BAI, Z. D. AND YIN, Y. Q. Convergence to the semicircle law 863–875

BAI, Z. D. AND YIN, Y. Q. Necessary and sufficient conditions for almost sure convergence of the largest eigenvalue of a Wigner matrix 1729–1741

BALKEMA, A. A. AND DE HAAN, L. Almost sure continuity of stable moving average processes with index less than one 333–343

BARLOW, M. T. Necessary and sufficient conditions for the continuity of local time of Lévy processes 1389–1427

BASS, RICHARD F. Probability estimates for multiparameter Brownian processes 251–264

BERG, CHRISTIAN. The cube of a normal distribution is indeterminate 910–913

BERGER, MARC A. A Malliavin-type anticipative stochastic calculus 231–245

BERMAN, SIMEON M. Extreme sojourns of diffusion processes ... 361–374

BHATTACHARYA, RABI N. AND LEE, OESOOK. Asymptotics of a class of Markov processes which are not in general irreducible . 1333–1347

BIRKEL, THOMAS. Moment bounds for associated sequences 1184–1193

BIRKEL, THOMAS. On the convergence rate in the central limit theorem for associated processes 1685–1698

BLOCK, HENRY W. AND FANG, ZHAOBEN. A multivariate extension of Hoeffding's lemma 1803–1820

BOLAND, PHILIP J., PROSCHAN, FRANK AND TONG, Y. L. Moment and geometric probability inequalities arising from arrangement increasing functions 407–413

BRADLEY, RICHARD C. A central limit theorem for stationary ρ-mixing sequences with infinite variance 313–332

BROWN, LAWRENCE D. AND RINOTT, YOSEF. Inequalities for multivariate infinitely divisible processes 642–657
BURDZY, KRZYSZTOF. On Brownian paths connecting boundary points 1034–1038
CARMONA, RENÉ AND NUALART, DAVID. Random nonlinear wave equations: Propagation of singularities 730–751
CARVERHILL, ANDREW. Conditioning a lifted stochastic system in a product space 1840–1853
CHEN, LOUIS H. Y. The central limit theorem and Poincaré-type inequalities 300–304
COVER, THOMAS M. AND ALGOET, PAUL H. A sandwich proof of the Shannon–McMillan–Breiman theorem 899–909
COVER, THOMAS M. AND ALGOET, PAUL H. Asymptotic optimality and asymptotic equipartition properties of log-optimum investment 876–898
COX, J. T. Some limit theorems for voter model occupation times 1559–1569
CSÖRGŐ, MIKLÓS AND HORVÁTH, LAJOS. On the distributions of L_p norms of weighted uniform empirical and quantile processes 142–161
CSÖRGŐ, SÁNDOR, HAEUSLER, ERICH AND MASON, DAVID M. The asymptotic distribution of trimmed sums 672–699
DALEY, D. J. Tight bounds on the exponential approximation of some aging distributions 414–423
DAVIS, BURGESS AND SALISBURY, THOMAS S. Connecting Brownian paths 1428–1457
DE ACOSTA, A. Large deviations for vector-valued functionals of a Markov chain: Lower bounds 925–960
DEBLASSIE, R. DANTE. Doob's conditioned diffusions and their lifetimes 1063–1083
DE HAAN, L. AND BALKEMA, A. A. Almost sure continuity of stable moving average processes with index less than one 333–343
DEN HOLLANDER, W. TH. F. Mixing properties for random walk in random scenery 1788–1802
DEUSCHEL, JEAN-DOMINIQUE. Central limit theorem for an infinite lattice system of interacting diffusion processes 700–716
DOYLE, PETER G., SHEPP, L. A. AND FISHBURN, PETER C. The match set of a random permutation has the FKG property ... 1194–1214
DUPUIS, PAUL. Large deviations analysis of some recursive algorithms with state dependent noise 1509–1536
DURRETT, RICHARD AND LIU, XIU-FANG. The contact process on a finite set 1158–1173
DURRETT, RICHARD AND SCHONMANN, ROBERTO H. The contact process on a finite set. II 1570–1583

DYNKIN, E. B. Regularized self-intersection local times of planar Brownian motion 58–74
DYNKIN, E. B. Self-intersection gauge for random walks and for Brownian motion 1–57
EINMAHL, JOHN H. J. AND MASON, DAVID M. Laws of the iterated logarithm in the tails for weighted uniform empirical processes 126–141
EINMAHL, JOHN H. J. AND MASON, DAVID M. Strong limit theorems for weighted quantile processes 1623–1643
EINMAHL, JOHN H. J. AND VAN ZUIJLEN, MARTIEN C. A. Strong bounds for weighted empirical distribution functions based on uniform spacings 108–125
ELLIS, RICHARD S. Inequalities for multivariate compound Poisson distributions 658–661
ELLIS, RICHARD S. Large deviations for the empirical measure of a Markov chain with an application to the multivariate empirical measure 1496–1508
FALK, M. AND REISS, R.-D. Independence of order statistics 854–862
FANG, ZHAOBEN AND BLOCK, HENRY W. A multivariate extension of Hoeffding's lemma 1803–1820
FILL, JAMES ALLEN. Bounds on the coarseness of random sums .. 1644–1664
FISHBURN, PETER C., DOYLE, PETER G. AND SHEPP, L. A. The match set of a random permutation has the FKG property ... 1194–1214
FITZSIMMONS, P. J. AND TAKSAR, MICHAEL. Stationary regenerative sets and subordinators 1299–1305
FÖLLMER, HANS AND OREY, STEVEN. Large deviations for the empirical field of a Gibbs measure 961–977
GANDOLFI, A., KEANE, M. AND RUSSO, L. On the uniqueness of the infinite occupied cluster in dependent two-dimensional site percolation 1147–1157
GAWRONSKI, WOLFGANG. Asymptotic forms for the derivatives of one-sided stable laws 1348–1364
GETOOR, R. K. Killing a Markov process under a stationary measure involves creation 564–585
GOLDEN, K., GOLDSTEIN, S. AND LEBOWITZ, J. L. Nash estimates and the asymptotic behavior of diffusions 1127–1146
GOLDSTEIN, S., LEBOWITZ, J. L. AND GOLDEN, K. Nash estimates and the asymptotic behavior of diffusions 1127–1146
GOODMAN, VICTOR. Characteristics of normal samples 1281–1290
GORDON, YEHORAM. Gaussian processes and almost spherical sections of convex bodies 180–188
HAEUSLER, ERICH. On the rate of convergence in the central limit theorem for martingales with discrete and continuous time ... 275–299
HAEUSLER, ERICH AND JOOS, KONRAD. A nonuniform bound on the rate of convergence in the martingale central limit theorem 1699–1720

HAEUSLER, ERICH, MASON, DAVID M. AND CSÖRGŐ, SÁNDOR. The asymptotic distribution of trimmed sums 672–699

HALL, PETER. On the effect of random norming on the rate of convergence in the central limit theorem 1265–1280

HALL, PETER. Rate of convergence in bootstrap approximations . 1665–1684

HANSEN, BJORN G. On log-concave and log-convex infinitely divisible sequences and densities 1832–1839

HORVÁTH, LAJOS AND CSÖRGŐ, MIKLÓS. On the distributions of L_p norms of weighted uniform empirical and quantile processes 142–161

HU, K. Y. A generalization of Kolmogorov's extension theorem and an application to the construction of stochastic processes with random time domains 222–230

ISCOE, I. On the supports of measure-valued critical branching Brownian motion 200–221

JACOD, JEAN AND PROTTER, PHILIP. Time reversal on Lévy processes 620–641

JAMES, BARRY, JAMES, KANG LING AND SIEGMUND, DAVID. Conditional boundary crossing probabilities, with applications to change-point problems 825–839

JAMES, KANG LING, SIEGMUND, DAVID AND JAMES, BARRY. Conditional boundary crossing probabilities, with applications to change-point problems 825–839

JANSON, SVANTE. Normal convergence by higher semiinvariants with applications to sums of dependent random variables and random graphs 305–312

JOOS, KONRAD AND HAEUSLER, ERICH. A nonuniform bound on the rate of convergence in the martingale central limit theorem 1699–1720

KALLENBERG, OLAV. Spreading and predictable sampling in exchangeable sequences and processes 508–534

KARLIN, SAMUEL AND OST, FRIEDEMANN. Maximal length of common words among random letter sequences 535–563

KASPI, H. Random time changes for processes with random birth and death 586–599

KASPI, H. AND MAISONNEUVE, B. Regenerative systems on the real line 1306–1332

KAUFMAN, ROBERT AND WU, JANG-MEI. An example on highly singular parabolic measure 1821–1831

KEANE, M., RUSSO, L. AND GANDOLFI, A. On the uniqueness of the infinite occupied cluster in dependent two-dimensional site percolation 1147–1157

KEY, ERIC S. Lyapunov exponents for matrices with invariant subspaces 1721–1728

KLASS, MICHAEL J. A best possible improvement of Wald's equation 840–853
KRAKOWIAK, WIESŁAW AND SZULGA, JERZY. A multiple stochastic integral with respect to a strictly p-stable random measure 764–777
KURTZ, T. G. AND OCONE, D. L. Unique characterization of conditional distributions in nonlinear filtering 80–107
LAI, TZE LEUNG. Boundary crossing problems for sample means . 375–396
LALLEY, S. AND SELLKE, T. Traveling waves in inhomogeneous branching Brownian motions. I 1051–1062
LEADBETTER, M. R. AND ROOTZÉN, HOLGER. Extremal theory for stochastic processes 431–478
LEBOWITZ, J. L., GOLDEN, K. AND GOLDSTEIN, S. Nash estimates and the asymptotic behavior of diffusions 1127–1146
LEDOUX, M. AND TALAGRAND, M. Characterization of the law of the iterated logarithm in Banach spaces 1242–1264
LEE, OESOOK AND BHATTACHARYA, RABI N. Asymptotics of a class of Markov processes which are not in general irreducible . 1333–1347
LEE, TZONG-YOW. Large deviations for noninteracting infinite particle systems 1537–1558
LE GALL, JEAN-FRANÇOIS. Fluctuation results for the Wiener sausage 991–1018
LIAO, MING. Hitting distributions of small geodesic spheres 1039–1050
LIU, XIU-FANG AND DURRETT, RICHARD. The contact process on a finite set 1158–1173
MAISONNEUVE, B. AND KASPI, H. Regenerative systems on the real line 1306–1332
MALLER, R. A. Asymptotic normality of trimmed means in higher dimensions 1608–1622
MASON, DAVID M., CSÖRGŐ, SÁNDOR AND HAEUSLER, ERICH. The asymptotic distribution of trimmed sums 672–699
MASON, DAVID M. AND EINMAHL, JOHN H. J. Laws of the iterated logarithm in the tails for weighted uniform empirical processes 126–141
MASON, DAVID M. AND EINMAHL, JOHN H. J. Strong limit theorems for weighted quantile processes 1623–1643
MATTHEWS, PETER. Covering problems for Brownian motion on spheres 189–199
MATTHEWS, PETER. Covering problems for Markov chains 1215–1228
MAZZIOTTO, G. Two-parameter Hunt processes and a potential theory 600–619
MERZBACH, ELY AND NUALART, DAVID. A martingale approach to point processes in the plane 265–274
MIAMEE, A. G. On the Wiener–Masani algorithm for finding the generating function of multivariate stochastic processes 1854–1859

NOLAN, DEBORAH AND POLLARD, DAVID. Functional limit theorems for U-processes 1291–1298
NOLAN, JOHN P. Path properties of index-β stable fields 1596–1607
NUALART, DAVID AND CARMONA, RENÉ. Random nonlinear wave equations: Propagation of singularities 730–751
NUALART, DAVID AND MERZBACH, ELY. A martingale approach to point processes in the plane 265–274
OCONE, D. L. AND KURTZ, T. G. Unique characterization of conditional distributions in nonlinear filtering 80–107
OELSCHLÄGER, KARL. Homogenization of a diffusion process in a divergence-free random field 1084–1126
OMEY, E. Rates of convergence for densities in extreme value theory 479–486
OREY, STEVEN AND FÖLLMER, HANS. Large deviations for the empirical field of a Gibbs measure 961–977
OREY, STEVEN AND PELIKAN, STEPHAN. Large deviation principles for stationary processes 1481–1495
OST, FRIEDEMANN AND KARLIN, SAMUEL. Maximal length of common words among random letter sequences 535–563
PELIKAN, STEPHAN AND OREY, STEVEN. Large deviation principles for stationary processes 1481–1495
PEMANTLE, ROBIN. Phase transition in reinforced random walk and RWRE on trees 1229–1241
PERKINS, EDWIN A. AND TAYLOR, S. JAMES. Measuring close approaches on a Brownian path 1458–1480
PINSKY, ROSS G. A mini-max variational formula giving necessary and sufficient conditions for recurrence or transience of multidimensional diffusion processes 662–671
POLLARD, DAVID AND NOLAN, DEBORAH. Functional limit theorems for U-processes 1291–1298
PROSCHAN, FRANK, TONG, Y. L. AND BOLAND, PHILIP J. Moment and geometric probability inequalities arising from arrangement increasing functions 407–413
PROTTER, PHILIP AND JACOD, JEAN . Time reversal on Lévy processes 620–641
REISS, R.-D. AND FALK, M. Independence of order statistics 854–862
RINOTT, YOSEF AND BROWN, LAWRENCE D. Inequalities for multivariate infinitely divisible processes 642–657
ROBERTSON, JAMES B. AND SIMONS, STEPHEN. A de Finetti theorem for a class of pairwise independent stationary processes .. 344–354
ROOTZÉN, HOLGER AND LEADBETTER, M. R. Extremal theory for stochastic processes 431–478
ROSEN, JAY. Continuity and singularity of the intersection local time of stable processes in $\mathbf{R}^2$ 75–79

RUSSO, L., GANDOLFI, A. AND KEANE, M. On the uniqueness of the infinite occupied cluster in dependent two-dimensional site percolation 1147–1157
RUSSO, RALPH P. Strong laws for quantiles corresponding to moving blocks of random variables 162–171
SALISBURY, THOMAS S. AND DAVIS, BURGESS. Connecting Brownian paths 1428–1457
SAMORODNITSKY, GENNADY. Continuity of Gaussian processes .. 1019–1033
SANZ, MARTA. Local time for two-parameter continuous martingales with respect to the quadratic variation 778–792
SCHONMANN, ROBERTO H. AND DURRETT, RICHARD. The contact process on a finite set. II 1570–1583
SELLKE, T. AND LALLEY, S. Traveling waves in inhomogeneous branching Brownian motions. I 1051–1062
SHANTHIKUMAR, J. GEORGE. DFR property of first-passage times and its preservation under geometric compounding 397–406
SHEPP, L. A., FISHBURN, PETER C. AND DOYLE, PETER G. The match set of a random permutation has the FKG property ... 1194–1214
SIEGMUND, DAVID. Approximate tail probabilities for the maxima of some random fields 487–501
SIEGMUND, DAVID, JAMES, BARRY AND JAMES, KANG LING. Conditional boundary crossing probabilities, with applications to change-point problems 825–839
SIMONS, STEPHEN AND ROBERTSON, JAMES B. A de Finetti theorem for a class of pairwise independent stationary processes .. 344–354
SLABY, M. On the upper bound for large deviations of sums of i.i.d. random vectors 978–990
STEELE, J. MICHAEL. Growth rates of Euclidean minimal spanning trees with power weighted edges 1767–1787
SZULGA, JERZY AND KRAKOWIAK, WIESŁAW. A multiple stochastic integral with respect to a strictly p-stable random measure 764–777
TAKSAR, MICHAEL AND FITZSIMMONS, P. J. Stationary regenerative sets and subordinators 1299–1305
TALAGRAND, MICHEL. Necessary conditions for sample boundedness of p-stable processes 1584–1595
TALAGRAND, MICHEL. The structure of sign-invariant GB-sets and of certain Gaussian measures 172–179
TALAGRAND, M. AND LEDOUX, M. Characterization of the law of the iterated logarithm in Banach spaces 1242–1264
TAYLOR, S. JAMES AND PERKINS, EDWIN A. Measuring close approaches on a Brownian path 1458–1480
THORISSON, HERMANN. Backward limits 914–924
TONG, Y. L., BOLAND, PHILIP J. AND PROSCHAN, FRANK. Moment and geometric probability inequalities arising from arrangement increasing functions 407–413

VAN ZUIJLEN, MARTIEN C. A. AND EINMAHL, JOHN H. J. Strong bounds for weighted empirical distribution functions based on uniform spacings 108–125
WEBER, MICHEL. Stochastic processes with value in exponential type Orlicz spaces 1365–1371
WU, JANG-MEI AND KAUFMAN, ROBERT. An example on highly singular parabolic measure 1821–1831
YANG, WEI-SHIH. The generators of a Gaussian wave associated with the free Markov field 752–763
YIN, Y. Q. AND BAI, Z. D. Convergence to the semicircle law 863–875
YIN, Y. Q. AND BAI, Z. D. Necessary and sufficient conditions for almost sure convergence of the largest eigenvalue of a Wigner matrix 1729–1741
ZÄHLE, M. Random cell complexes and generalised sets 1742–1766
ZHANG, CUN-HUI. A nonlinear renewal theory 793–824

Book Reviews

GAENSSLER, PETER. Review of *Empirical Processes with Applications to Statistics* by Galen R. Shorack and Jon A. Wellner . 1372–1388
SINE, ROBERT. Review of *Ergodic Theorems* by Ulrich Krengel . 424–428

Correction

SERFOZO, RICHARD F. Compound Poisson approximations for sums of random variables 429–430
